ALL TYPES OF REPUBLICANS JOIN IN LAUDING MR. ROOT

Following is the formal statement launching Elihu Root's boom for the Presidency:

E LIHU ROOT is the ablest living American.

The next four years will be critical in the life and influence of the

people of the United States. New and vitally important problems confront the American people. Not only the domestic questions of national prosperity, of economic and industrial readjustment, of the social welfare and of the best use of our natural resources are pressing for solution, but the international policy of the nation is now to be defined in terms of present day needs and relations. At this time the nation requires its best trained, most experienced and

most thoroughly tested leader in the highest executive office. After sixteen years of devoted public service as Secretary of War, Secretary of State and Senator of the United States, Elihu Root stands preeminent among contemporary Americans as a constructive, far sighted and forward facing statesman. While he has declined to become a candidate for even the highest political office, yet if nominated for the Presidency by the coming national convention at Chicago his sense of public duty must con pel his acceptance.

As Americans, believing in an American policy at home and abroad and in proper preparation to express and to defend such a policy, we favor the nomination of Elihu Root for the Presidency of the United States.
